Annual Christmas Gathering at Bethesda Hospital

Tuesday 27 November 2012

At its annual clinical association meeting, and Christmas celebratory drinks held at the Hospital cafe on 8 November 2012, Bethesda Hospital Chairman Dr Neale Fong had much to cheer about.

Attended by the Bethesda Hospital board, senior staff, accredited doctors, and other stakeholders, the 100 strong crowd enjoyed the hospitality of the Hospital's award winning catering team, whilst looking at the sun set across the Swan River.

Dr Fong reported that 2012 had seen a number of achievements at the Hospital including a strengthened clinical governance framework, high level of patient satisfaction, increasing levels of doctor satisfaction as well as very successful Hospital accreditation through ACHS.

Dr Fong also noted that the Bethesda board was working hard on all areas of current business of the Hospital, which would hold them in good stead for a long-term successful future. These areas encompassed being a visionary Board, strong executive leadership, a culture of innovation and doing things differently, highly credentialed doctors working with the Hospital in an array of specialties, and a product offering that is in demand.

'Our vision is to be the preferred choice of hospital for doctors, patients and staff and be highly regarded for the care we provide. We also aspire to be relevant and undertake the work for which we were established nearly 70 years ago'.

Dr Alister Turner, Chairman of the Bethesda Hospital Medical Advisory Committee also spoke to the group and the relevant MAC positions for 2013 were chosen.

On behalf of the Bethesda Hospital Board of Directors, Dr Fong thanked all of its staff including volunteers, and accredited doctors for their continued work and dedication towards providing excellent health care to the Western Australian community.
